

8.5M Straight Inflatable Pontoon

Designed sleek and straight, the Bartlett 8.5M Straight Pontoon allows a multitude of uses for boating, fishing, swimming, or access to deeper water. The Bartlett 8.5M Straight Pontoon is perfect for loading and unloading from watercraft such as boats, jet skis and kayaks so that the watercraft doesn't run aground risking damage, whilst still making it easy to embark or disembark. For use with water sports, the Bartlett 8.5M Straight Pontoon can be used to launch wakeboards, kneeboards or dry-start off the end into the water.

Built to last in Australian conditions, Bartlett Inflatable Pontoons are manufactured from commercial grade CE Certified Drop-Stitch Double Wall Fabric (DWF), designed to withstand a high amount of air pressure making them strong, rigid, and incredibly stable on the water. Most importantly, they are easy to deflate allowing to simply fit in a car or boat for transporting to and from the water.

Become the envy of everyone on the shore with the ultimate summer accessory, a Bartlett Inflatable Pontoon. These floating docks make an awesome swimming platform, extension of space while on a boat or the perfect spot to sit-back, relax and soak up the summer sun. Take it to the holiday home, float it off the beach, use it as a yoga platform or lash a few together to increase on-water real estate. The possible uses for Bartlett 8.5M Straight Pontoons are endless at the local beach, lake, dam, or river.

Created with D-rings top and bottom, the Bartlett 8.5M Straight Pontoons have tie-points thoughtfully placed in positions that allow them to connect to other Bartlett Inflatable Pontoons across the range. Locking together other components such as the Bartlett Diamond Pontoon or 4Mx2M Deck Extender Pontoon allows endless possibilities for different shaped floating docks accommodating so many situations.

LENGTH (MTRS)	WIDTH (MTRS)	THICKNESS (MTRS)	WEIGHT (KG)
8.5M	1.4M	0.2M	41KG
