Inflatable Boat Fenders

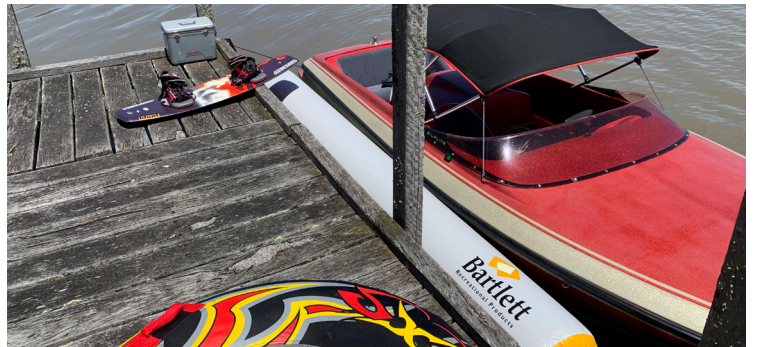

Bartlett Inflatable Boat Fenders are designed to provide reliable protection for your watercraft in a variety of docking scenarios. These fenders are available in multiple lengths, ensuring that boat owners can select the right size to fit their vessel. This versatility makes them a suitable option for securing boats against hard surfaces such as jetties, piers, and walkways, as well as protecting against other boats.

Bartlett Inflatable Boat Fenders are built to last in the tough Australian marine environment, using commercial grade 900GSM supported PVC fabric. This material is strong and resistant to abrasions, punctures, and UV rays, ensuring that the fenders can withstand heavy use and exposure to the elements. They are also designed to be flexible and can absorb impact from hits and bumps, providing effective protection for your watercraft.

Bartlett Inflatable Boat Fenders can be easily inflated and deflated using a SUP type quick inflation valve, which makes them convenient to use. They can be deployed in both horizontal and vertical orientations and have heavy-duty D-rings that provide added strength and flexibility when securing them to a boat.

One of the key benefits of Bartlett Inflatable Boat Fenders is their storage-friendly design. When deflated, they can be easily stored in almost any storage area, making them an ideal solution for boats of all sizes, including ski boats, jet skis, tinnies, and yachts.

LENGTH (MTRS)	LENGTH (FT)	DIAMETER (MTRS)	WEIGHT (KG)	RECOMMENDED AIR PRESSURE
0.6 M	2 FT	0.45 M	1.8 KG	< 1 PS1
1.2 M	4 FT	0.45 M	2.0 KG	< 1 PS1
1.8 M	6 FT	0.45 M	3.0 KG	< 1 PS1
3.6 M	12 FT	0.45 M	5.0 KG	< 1 PS1

- >> Heavy Duty 900GSM PVC
- >> Repair Kit (included)
- >> Carry Bag (included)
- >> D-rings Both Ends
- >> Quick Inflation Valve (SUP type)
- >> Small Pack-Up
