**Bartlett Blinds**

## Bartlett Auto Awning

The most traditional and popular of the awning designs. This spring-loaded awning allows the blind to be easily raised and lowered to any position, giving you the ability to have full control of the sun exposure to your home. Automatic awnings are available in a range of arm lengths to suit any application. Whilst it provides your home with protection from harsh elements, it also allows for cross ventilation to your home.

*Available in mesh, acrylic and canvas.*

## Ziptrak External Blinds

**Indulge and relax in your outdoor retreat.**

Ziptrak Blinds allow you to control airflow, light, and temperature whilst remaining connected to nature.

A fully enclosed specially designed track guided system allows the fabric to glide smoothly which gives you the ability to stop at any height. This system is simple and safe to operate – no chains, ropes or pulley's, zips, or buckles.

With a various range of different options, you can tailor your Ziptrak Blinds to suit any home permitting you to expand your living space whilst avoiding costly renovations.

*Available in mesh, acrylic and PVC.*

## Bartlett Straight Drop

**A timeless verandah blind.** This traditional straight drop blind is popular for verandah, pergolas, and patios. It provides protection as well as allowing airflow from both sides. You have the option of 3 simple operation systems that can be spring, gear or motorised. With a multitude of variations, and versatile installation you can custom design your straight drop blind to suit any home and any applications.

*Available in mesh, acrylic, PVC and canvas*

## Bartlett Pivot Arm Awning

**A Heavy duty and contemporary design:**

The Pivot Arm awning is suited to both windows and doors. Available in geared or motorised this Awning projects away from the windows or doors and by adjusting the pivot arms pitch you can control the sunlight and shade entering your home whilst allowing airflow.

*Available in mesh, acrylic and canvas.*

## Bartlett Fixed Guide Awning

**Traditional awnings designed for high windows:** Fixed guide awnings are a simple design that operates on guide bars which are permanently fixed. Available in a gear, rope and pulley or motorised operations these blinds are suitable for second storey applications as well as ground floor. The design of these blinds gives you the option of stopping at any height allowing you to control heat and sun entering your home.

*Available in mesh, acrylic and canvas.*

## Bartlett Wire Guide Blind

**Sleek and Modern design:** Wire Guide Blinds a simple alternative to almost any outdoor application. The blind runs up and down pre-tensioned stainless steel wires. These Wires, which are permanently fixed, act as a guide for the base rail. With the ability to be stopped at any level down the guide wires, the wire guide blind lends itself particularly well to motorisation.

*Available in mesh, acrylic and canvas*

# FABRIC RANGE

## Canvas

Canvas has traditionally been the most popular fabric used for awnings. With 100% block out and long-lasting reputation, canvas is the number one choice to block out the sun. Bartlett blinds use quality Australian made canvas. Our canvas range has a vast array of colours and designs to choose from.

**Benefits:** *100% UV Block out keeps your home cool in Summer for longer.*

## Woven Mesh

Woven mesh has style and functionality that you just can't beat. This revolutionary awning fabric lets in light yet keeps you out of the sun. Woven mesh's unique design allows you to see through whilst filtering out the sun's damaging rays and keeping the interior cool.

**Benefits:** *available in different ranges of block out to tailor to your awning needs.*

## Acrylic

Acrylic is light weight fabric which allows sunlight to penetrate through, without enabling you to see through the fabric. The solution dyed acrylic will bring colour and enhance your home.

**Benefits:** *Reduces solar heat gain by up to 90%*

## Clear and Tinted Plastic

Clear and tinted PVC is a popular option for enclosing any outdoor entertaining area. PVC blinds are fully transparent allowing unrestricted view whilst blocking out the elements. These Awnings also keep the warmth in during the cooler months allowing you to maximise the use of your outdoor area all year round.

**Benefits:** *Treated with UV inhibitors to minimise the effect of the sun's harmful rays. 100% protected from the wind and the rain.*

## Motorisation and Automation:

Automating your blinds and awnings can simplify a hectic lifestyle. Not only can you operate your awnings at the touch of a button, our motors are also compatible with Google Home, Amazon Alexa or Apple with Siri, giving you the ability to raise and lower your blinds and awnings from anywhere. Our solar powered wind sensors will ensure your blinds are safely put away on those windy days.

**Benefits:** *Ideal for those hard to reach blinds and awnings.*
